This is much wordier then I remembered so may not be a good fit----

Bears Ears National Monument was originally established by Proclamation 9558 of December 28, 2016. The original designation encompassed 1.35 million acres. On December 4, 2017, President Trump released Proclamation 9681 modifying the BENM. The remaining portions of the BENM are included in two units, known as the Indian Creek (71,896 acres of BLM-administered surface), and Shash Jáa (97,393 acres of BLM-administered land and 32,587 acres of National Forest System Lands) units of the monument.

On December 4, 2017, President Trump released Proclamation 9682 modifying the Grand Staircase Escalante National Monument (GSENM). The modified boundaries of the GSENM exclude from designation and reservation approximately 861,974 acres of land; the remaining portions of the GSENM are included in three units, known as the Grand Staircase (209,993 acres of BLM-administered surface), Kaiparowits (551,034 acres of BLM-administered surface), and Escalante Canyons (242,836 acres of BLM-administered surface) units of the monument.
